College Dropout Re-Enrollment Rates

In general, students who drop out of college and re-enroll later are less likely to drop out a second time. Full-time students are always more likely than part-time students to complete an award.

In 2022, 943,169 SCNCs enrolled in postsecondary degree-granting institutions.

Roughly 2-3% of all SCNCs re-enroll, regardless of their original degree-granting institution.

Of those re-enrolled students, men make up 40.4%, while women contribute to 56.6% of the re-enrolled population.

SCNCs who attended primarily online institutions are more likely to re-enroll after dropping out than other types of institutions.

College Dropout Employment Rates

While college dropouts earn lower wages than college graduates, SCNCs earn more than high school graduates.

Workers with some college but no degree have a 3.3% unemployment rate, which is 10.0% higher than the national average.

Workers aged 25 and over with some college but no degree make an average of $992 weekly, which is 17.9% less than the average worker.

Workers aged 25 and older with some college but no degree make 6.7% less than associate's degree holders on average.

Workers aged 25 and older with some college but no degree make % more than high school diploma only.

Workers with bachelor's degrees make a 50.5% higher income than SCNC workers.

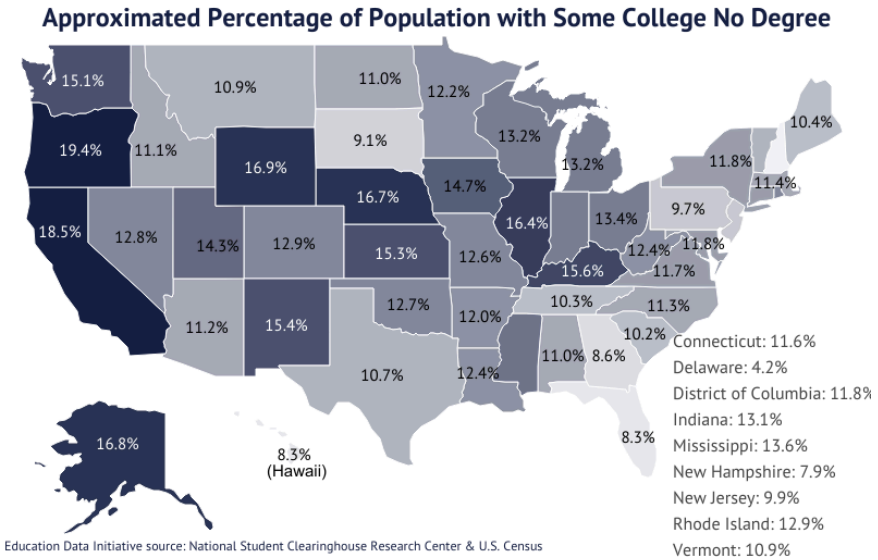
College Dropout Rate Demographics

There is a direct correlation between lower income and an increased risk of dropout among all postsecondary

students. Older students are also more likely to drop out than students who first enrolled as teenagers.

> There is a lower percentage of college students who drop out between the ages of 35 and 64 than under 35.
>
> Until 24 years old, women exhibit higher rates of dropout, whereas, after the age of 25, men tend to be more prevalent in their dropout rate.
>
> Asian students make up 2.6% of all dropouts, which is the third lowest among ethnic demographics.
>
> Native American students make up 1.0% of all dropouts, which is the second lowest among ethnic demographics.
>
> Black students make up 14.1% of all dropouts.
>
> White students make up the largest group of all dropouts, at 32.9% compared to all other college dropouts.



College Dropout Rates by State

College dropout and SCNC rates vary according to region. Population density, local economy, and public education statistics all impact success rates among college students.

College dropouts are more likely to live in California than in any other state.

Alaska has the highest dropout-to-undergraduate ratio, with dropouts outnumbering enrolled undergraduates almost 6-to-1.

8% of dropouts in Texas were last enrolled in college when they were 45 to 64 years old, which is the lowest ratio for that age group among all states.

Mississippi has the highest percentage of college dropouts (61.3%) last enrolled when they were under the age of 25.
